DETAILED ACTION

Specification

1. Applicant is reminded of the proper language and format for an abstract of the disclosure.

The language should be clear and concise and should not repeat information given in the title. It should avoid using phrases which can be implied, such as, "**The invention relates to**," "The disclosure defined by this invention," "The disclosure describes," etc.

2. The disclosure is objected to because of the following informalities:

Paragraphs lack proper heading (e.g. Background of the invention, Summary of the invention...ect.)

3. Claims 1-16 are objected to because of the following informalities:

The claims are replete with antecedent basis, for example:

a. claim 2 lines 4 and 5 the recitations "the opposite direction" and "the initial direction."

b. claim 5 line 3 recites "the position".

Note: This is merely **exemplary** and is not to be **construed** as a complete listing of the errors. Also, while the claimed language is understandable, the office suggests that these claims be rewritten to conform with U.S format/standard.

Appropriate correction is required.

Claim Rejections - 35 USC § 112

4. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 6-9 and 13-16 rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

The recitation of "it" or "they" is being used to refer back to a specific structure/limitations are unclear and confusing.

Allowable Subject Matter

5. Claims 1-16 would be allowable if rewritten to overcome the rejection(s) under 35 U.S.C. 112, 2nd paragraph and claims objection, set forth in this Office action.
